

Ratios

put patient
safety *first*

GLOBAL DAY OF ACTION

The next Ratios campaign events will be held

17 September » Sydney
10 am & 12.30pm

17 September is a global day of action as nurses and midwives from 14 countries stand together as part of the newly created Global Nurses United (GNU). The GNU is committed to standing up against the harmful effects of austerity measures, privatisation, and cuts in health care services. We will again demand that the NSW government put patient safety first by improving and extending ratios.

The earlier time will allow off duty and afternoon shift metropolitan members to participate but **all** members are invited to attend **both**. Don't forget about our commitment to collect **100,000 petition signatures by 17 September** – please bring the original petitions with you to the main event in Sydney. From 9 September, rural branches will be organising local activities to hand over their petitions to branch Delegates attending the Sydney events.

More details will be made available in coming weeks but **SAVE THE DATE**, contact your branch, get involved and pull out all stops to be part of the global day of action!
DON'T FORGET TO WEAR YOUR SCRUBS!
