

# PPE

## YOUR RIGHT TO PRACTICE SAFELY

All nurses and midwives  
in NSW have a right to stay  
safe and protected at work

### BE INFORMED

about appropriate  
personal protective  
equipment (PPE):  
what you need and when

### SPEAK UP

if you are concerned  
for your safety or others  
and respond appropriately  
to unsafe or  
unprofessional practice

### INSIST

that your P2/N95 is fit  
tested. If it fails the fit test  
you must be redeployed  
away from risk of exposure

### REFUSE

to undertake tasks  
if the appropriate PPE  
is not available

### REACH OUT

to colleagues and work  
together to improve  
workplace safety. Ask the  
NSWNMA about becoming  
a Health and Safety Rep

### REPORT

incidents and escalate  
concerns to your manager  
and the NSWNMA

Join the union and encourage  
your colleagues to join

**WE ARE STRONGER TOGETHER**

\*Stay informed  
and up to  
date with the  
latest PPE  
information  
and advice
